Election/Restrictions

1. This application contains claims 1, 5-15, 17, 19 and 20 directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

a. Species I, drawn to a radiation-emitting semiconductor component with a layer structure wherein the semiconductor component is an LED.

b. Species II, drawn to a radiation-emitting semiconductor component with a layer structure wherein the semiconductor component is a laser diode in which a first waveguide layer is disposed between the active layer and the n-doped confinement layer, and a second waveguide layer is disposed between the active layer and the p-doped confinement layer, wherein the first waveguide layer is doped with the second n-dopant.

2. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by

Art Unit: 2814

37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. The claims are deemed to correspond to the species listed above in the following manner:

- claims 1, 5-7, 12-15 and 17 read on Species I
- claims 1, 8-15, 17, 19 and 20 read on Species II

The following claims are generic to both of the Species: claims 1, 12-15 and 17.

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Claim 5 of Species I describes the semiconductor component as an LED, while Claim 19 of Species II describes the semiconductor component as a laser diode, which has a first and second waveguide layer, wherein the first waveguide layer is doped with the second n-dopant. Thus, the two species do not have the same technical features, and therefore, are mutually exclusive and lack unity.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to ABUL KALAM whose telephone number is (571)272-8346. The examiner can normally be reached on Monday - Friday, 9 AM - 5 PM.
